# welcome

*Dear friends and colleagues,*

*we are very pleased to invite you all to join us at the the “Aesthetic Surgery of the Breast, Sixth European Conference”, that will be held from 10th to the 13th December 2014 in Milan.*

*As usual we have developed a challenging programme for those of you that will join us. The faculty has been chosen to really give you the best outlook on every single aspect of Aesthetic Surgery of the Breast. Various Instructional courses will be used throughout the programme where experts will be holding sessions focused on one aspect of surgery. The use of videos in all the lectures will help to keep the educational level very high. Live surgery will be held on Saturday 13th December and has proved so popular in the past that we decided to include the session again this year. The first day of the congress will be dedicated to Facial Harmony - minimal and non invasive procedures for facial rejuvenation. Many world experts will be present and we will also be giving some time to industry to allow participants to find out about new technology and new products.*

*This year we will be holding the meeting again in the seat of the prestigious financial daily newspaper “Il Sole 24 ore”. The building was designed by Renzo Piano (one of the most prominent Italian architects). The busy building with an award winning meeting room will be a pleasant change from the traditional hotels that we have used up until now. The choice of the venue however, implicates that we have a limited number of places, so therefore we suggest early registration to guarantee a place for you.*

*Some of the features of the conference:*

- *new guest speakers*
- *video teaching sessions*
- *instructional courses*
- *lots of interactive discussion sessions*
- *programme, abstracts and articles downloadable with i-pad or smartphone by QR code*
- *live surgery session*

*Please note the dates in your diary, and I really hope to see you all in Milan in December*

Best regards.  
Maurizio Nava
