AESTHETIC BREAST MEETING
MILANO, 12th - 15th DECEMBER 2018

Mi.Co. Fiera Milanocity

MBN 2018
We always try to listen to the requests of our participants that follow us faithfully every year and try to make the changes in our program based on these suggestions. We love to bring new ideas and format renewals and try to keep up with the modern way of communicating with the attendees. The result of us taking all of this in consideration is that I have decided to change the conference this year and introduce live surgery and three pre-conference courses and master classes each day before and after the end of the main plenary sessions. This will imply greater commitment from all of us that are part of my team and a more challenging job by the faculty. In order to offer more space for more participants and allow more comfort inside and outside the conference venue, I decided to move to the MiCo, Milano Conference, a well-known conference center in the heart of Milano CityLife, Future inside the past and close to downtown Milan.
