**AESTHETIC
BREAST MEETING**

MILANO

WELCOME

We are delighted to welcome you to MBN 2026, the Milano Breast Network, which will take place in Milan from 3 to 5 December, in a beautiful new venue right in the heart of the city.

After the great success of the 2024 edition entirely dedicated to aesthetic breast surgery, we have prepared an even richer and more ambitious meeting for this year, once again focused exclusively on aesthetic breast surgery. We believe that one of the greatest strengths of MBN 2026 will be its outstanding international faculty, with world-class speakers coming from 15 different countries. Their experience, vision, and surgical expertise will offer participants a truly unique opportunity to learn from some of the most respected names in the field.

At the same time, MBN 2026 will not follow the traditional congress model based simply on a long sequence of lectures. We have designed the meeting to be far more dynamic and interactive, with extensive space dedicated to discussion, controversies, round tables, video sessions, live planning, and exchange between faculty and audience. Our goal is not only to share knowledge, but to encourage real discussion, critical thinking, and practical take-home messages.

For this reason, we believe that MBN 2026 will offer an exceptionally high scientific level, combined with a format that is modern, engaging, and strongly focused on what really matters in everyday practice.

We are confident that this will be a meeting not to be missed for anyone with a serious interest in aesthetic breast surgery, and we very much look forward to welcoming you to Milan this December.

Paolo Montemurro - Congress President

Maurizio Bruno Nava - Honorary President

MBN YOUNG 2026

Major international meetings such as the MBN are undoubtedly of great value for surgeons who already have some experience in aesthetic breast surgery. However, for young surgeons, some topics may at times feel too advanced or not immediately applicable to everyday practice. For this reason, after the great success and outstanding participation of 2024's edition, MBN 2026 will once again dedicate an entire afternoon to young surgeons with MBN YOUNG.

The goal of MBN YOUNG is to provide practical, useful, and immediately applicable take-home messages to those who are still at an early stage of their career. Basic but essential topics such as implant choice, surgical technique, complication management, and decision-making in breast augmentation will be discussed by the same international faculty of the MBN. This will give young surgeons the unique opportunity to interact directly with world-renowned speakers, ask questions, and openly discuss the issues they face in daily practice.

This year, in addition to focused educational talks, MBN YOUNG will also include a video session, interactive discussions, and a live planning session with models, offering participants an even more practical and engaging learning experience.

MBN YOUNG will take place on
SATURDAY, 5 DECEMBER
STARTING AT 14:00
in the same conference centre where
the MBN takes place.
